A Seamless Integration of Gretl and R

Sagiru Mati (PhD)

1 About gretlR

gretlR is an R package that can run gretl program from R Markdown.

2 Installation

gretlR can be installed using the following commands in R.

3 Usage

```{r gretlR}

```
Please load the gretlR package as follows:
```

```
library(gretlR)
Then create a chunk for gretl as shown below:
```{gretl gretlR,eval=T,echo=T,comment=NULL}
nulldata 500
set seed 13
gretl1 = normal()
gret12 = normal()
setobs 12 1980:01 --time-series
gnuplot gretl1 --time-series --with-lines --output="line.png"
gnuplot gretl2 gretl1 --output="scatter.png"
ols gretl1 const gretl2
modeltab add
tabprint --output="olsTable.Rmd"
tabprint --output="olsTable.tex"
tabprint --output="olsTable.csv"
eqnprint --output="olsEquation.tex"
```

The above chunk creates a gretl program with the chunk's content, then automatically run the gretl script, which will save gretl outputs in the new folder gretlR created in the current working directory.

4 include_graph function

We can dynamically and reproducibly fetch the gretl graph object we created with the gretl chunk using the following R chunk:

For the scatter graph:

```
include_graph(chunk = "gretlR",graph = "scatter.png")
```

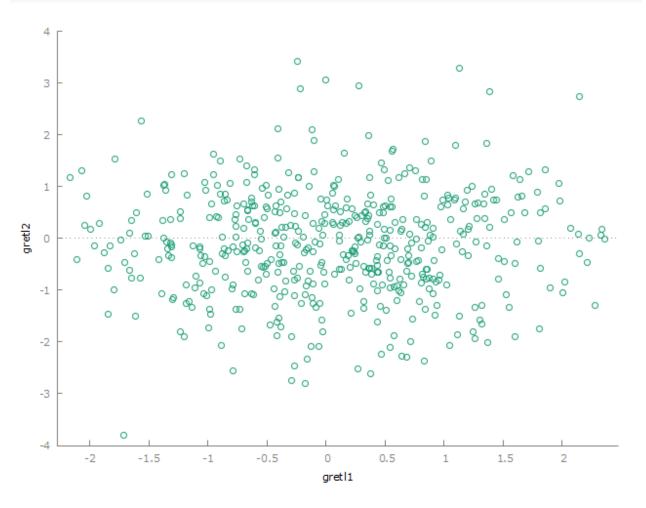

Figure 1: Scatter graph produced by gretl chunk

or the line graph:

```
include_graph(chunk = "gretlR",graph = "line.png")
```

5 include tex function

we can also include the equation of the OLS generated by the gretl chunk and save as olsEquation.tex. If the output is pdf, one can use the raw LaTeX codes as follows:

\input{gretlR/gretlR/olsEquation.tex}

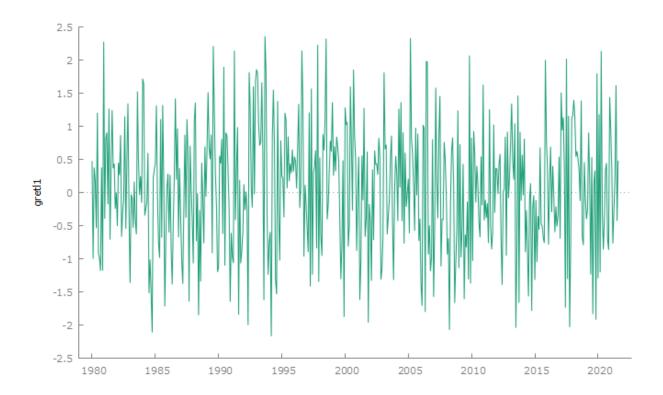

Figure 2: Line graph produced by gretl chunk

$$\widehat{\text{gretl1}} = 0.0610266 + 0.0239587 \, \text{gretl2}$$

$$T = 500 \quad \bar{R}^2 = -0.0014 \quad F(1, 498) = 0.32454 \quad \hat{\sigma} = 0.96025$$
(standard errors in parentheses)

Or use include_tex function to include the equation as shown below:

```
include_tex(chunk = "gretlR",tex = "olsEquation")
```

$$\widehat{\text{gretl1}} = 0.0610266 + 0.0239587 \, \text{gretl2}$$

$$T = 500 \quad \bar{R}^2 = -0.0014 \quad F(1, 498) = 0.32454 \quad \hat{\sigma} = 0.96025$$
(standard errors in parentheses)

```
include_tex(chunk = "gretlR",tex = "olsTable",start = 7,end = 24)

Coefficient Std. Error t-ratio p-value

const 0.0610266 0.0431785 1.413 0.1582

gretl2 0.0239587 0.0420559 0.5697 0.5691
```

The OLS table output is saved by the gretl chunk as olsTable.Rmd. The entire OLS table output can included as child document as follows:

```
```{r child, child='gretlR/gretlR/olsTable.Rmd'}
```

. . .

Model 1: OLS, using observations 1980:01–2021:08 (T=500) Dependent variable: gretl1

	Coefficient	Std. Error	$t ext{-ratio}$	p-value
const	0.0610266	0.0431785	1.413	0.1582
gretl2	0.0239587	0.0420559	0.5697	0.5691

Mean dependent var	0.058464	S.D. dependent var	0.959598
Sum squared resid	459.1937	S.E. of regression	0.960248
$R^2$	0.000651	Adjusted $R^2$	-0.001355
F(1,498)	0.324542	P-value $(F)$	0.569148
Log-likelihood	-688.1853	Akaike criterion	1380.371
Schwarz criterion	1388.800	Hannan-Quinn	1383.678
$\hat{ ho}$	-0.046001	Durbin-Watson	2.091190

## 6 import\_kable function

The gretl chunk also saves the OSL table as olsTable.csv. The import\_kable function can be used to import it as a table. further customisation can be done with kableExtra package.

Table 1: Table generated from gretl chunk

	coefficient	std. error	t-ratio	p-value
const	0.06	0.04	1.41	0.16
gretl2	0.02	0.04	0.57	0.57

## 7 write\_inp function

This function writes gretl file.

```
code=r'(nulldata 500
set seed 13
gret11 = normal()
gret12 = normal()
setobs 12 1980:01 --time-series
gnuplot gret11 --time-series --with-lines --output="line.png"
gnuplot gret12 gret11 --output="scatter.png"
)'
write_inp(code,path="gret1Codes")
```

#### 8 exec inp function

This function executes existing gretl files.

```
code=r'(nulldata 500
set seed 13
gretl1 = normal()
gretl2 = normal()
setobs 12 1980:01 --time-series
gnuplot gretl1 --time-series --with-lines --output="line.png"
gnuplot gretl2 gretl1 --output="scatter.png"
)'
write_inp(code,path="SomeFolder/gretlCodes")
exec_inp("someFolder/gretlCodes")
```

#### 9 exec\_gretl function

This function creates gretlfile from R object or a set of character strings and executes it. It is a combination of write\_inp and exec\_inp functions.

```
code=r'(nulldata 500
set seed 13
gretl1 = normal()
gretl2 = normal()
setobs 12 1980:01 --time-series
gnuplot gretl1 --time-series --with-lines --output="line.png"
gnuplot gretl2 gretl1 --output="scatter.png"
)'
exec_gretl(code)
```

#### 10 Demo

Demo can be accessed via demo(package="gretlR").

```
demo(exec_inp)
```

```
demo(write_inp)
 demo(write_inp)
> library(gret1R)
> code=r'(nulldata 500
+ set seed 13
+ gretl1 = normal()
+ gret12 = normal()
+ setobs 12 1980:01 --time-series
+ gnuplot gretl1 --time-series --with-lines --output="line.png"
+ gnuplot gretl2 gretl1 --output="scatter.png"
+)'
> write_inp(code,path="gretlCodes")
demo(exec_gret1)
 demo(exec_gret1)
 ____ ~~~~~~~
> library(gretlR)
> code=r'(nulldata 500
+ set seed 13
+ gretl1 = normal()
+ gret12 = normal()
+ setobs 12 1980:01 --time-series
+ gnuplot gretl1 --time-series --with-lines --output="line.png"
+ gnuplot gretl2 gretl1 --output="scatter.png"
+)'
> exec_gretl(code)
```

## 11 R Markdown template

The R Markdown template for the gretlR can be accessed via file  $\rightarrow$  New File  $\rightarrow$  R Markdown  $\rightarrow$  From Template  $\rightarrow$  gretlR

Please download a set of example files from Github.
